Aviation Security Management - Advanced (Classroom, 5 days)

The role of a security manager is vital in keeping aviation security (Avsec) measures relevant and in ensuring a proactive approach to security within the organization. This course helps you overcome both internal and external Avsec challenges.

Evaluate in-house and outsourced Avsec options, and learn how to select the right Avsec contractors for your organization. With the help of practical exercises, improve your contract management skills by learning how to select vendors and create request for proposal (RFP). Gain the skills you need to implement countermeasures that increase airport security, and simultaneously improve business by blending facilitation with security.

Course format

This classroom course provides 5 days (40 hours) of instruction delivered by an official IATA Instructor.

Student performance will be based on an examination

Prerequisites

- Combine security with customer service
- Select Avsec contractors and create RFPs
- Manage human factors in aviation security
- Implement quality control measures to improve security
- Conduct vulnerability assessment of your organization
- Evaluate screening points and procedures for passenger and cargo
